# RIKO Fast tow trailers with cranes.

**Temporary leaflet 17-09-20. Due to Brexit and fluctuating exchange rate prices are not binding.**

The Riko UK Fast Tow trailers are 3500Kg gross weight trailers fitted with timber cranes and built in petrol engine hydraulic power packs. Both trailers are fully IVA approved and can be fitted with various sizes of timber cranes. The usual crane is the CO470 with one extension that gives a maximum reach of 4.7 meters and has a lift capacity of 550Kg at 3.5M and 370Kg at 4.7m. The RU-FT3500RKC is a timber trailer with bolsters, the RU-FT3500TP is a tipping trailer with drop sides and optional mesh extensions. Exact specification varies depending on the customers final requirements and the following prices are for the specification shown in the pictures.

**The height of the trailer hitch ball / ring will vary depending on whether the trailer is loaded or empty. For this reason, it is strongly recommended that the towing vehicle is fitted with an adjustable height tow bar so that vehicle ball / jaw height can be adjusted to suit the height of the trailer hitch ball / ring. It is the purchaser's responsibility to ensure the vehicle is suitable / capable of towing the trailer. For towing speeds over 40mph we recommend the optional 3<sup>rd</sup> axle upgrade, POA.**

**RU-FT3500RKC: £12,200 + vat. ULW: twin axle from 1350kg. 3 axle from 1450Kg.**

**RU-FT3500TP: £14,200 + vat. ULW: twin axle from 1450kg. 3 axle from 1550Kg.**
